@RudenkoBA

SKILLS

Programming
- Python (algorithms, OOP)

Data Manipulation
- NumPy, Pandas

Relational Databases Management
- PostgreSQL, SQLAlchemy

Machine Learning
- Scikit-learn, XGBoost, Optuna

Deep Learning
- PyTorch

Statistical analysis
- SciPy

Data visualization
- Matplotlib, Seaborn

Version Control & MLOps
- Git, MLflow

ABOUT ME

Physics student at MSU with hands-on experience in data analysis and computational methods. Enjoy working with Python for research tasks and problem-solving. Interested in practical applications of mathematical modeling and data processing techniques.

LANGUAGES

- **English**

(Fluent in technical communication)

- **Russian**

(Native)

SCIENCE

- orcid.org/0009-0009-7944-5179

AWARDS

kaggle 2024 -

Notebooks Expert | *Analytic and ML Practitioner*

https://www.kaggle.com/rudenkobogdan

- **Top 0.8%** at kaggle Notebooks (433 out of ~57 000) on 2025
- Top 25% performance at kaggle PS S4E11 competition
- Top 30% performance at kaggle PS S4E8 competition
- Authored **20+ medal-winning** notebooks (2 Silver, 19 Bronze)

Key tasks: Competitive machine learning, advanced data analysis

Key techs: Scikit-learn, XGBoost, LightGBM, CatBoost, Statsmodels, GridSearchCV, Optuna, PyTorch, TorchVision, Sweetviz, Plotly

WORK EXPERIENCE

Moscow State University 2022 - 2025

Data Engineer | *Scientist*

https://istina.msu.ru/workers/520466591

Works as a Data Engineer for a robotic telescope network.

- Searching for significant objects in **10+TB/day** data stream
- Cleaning the database from noise/irrelevant data
- Based on applying **statistical analysis** to identify scientifically meaningful patterns, **discovered and reported 5**+ astrophysical transients, including **AT 2024cuc** (TNS-classified object) https://www.wis-tns.org/object/2024cuc

Key tasks: Data mining, data cleaning, astrophysical object detection, database optimization, statistical analysis

EDUCATION

Bachelor's & Master's Degree 2021 - 2027

Mathematical and Theoretical Physics

Faculty of Physics | Moscow State University (MSU)

Interfaculty course "ML for solving applied problems" 2024

Moscow State University (MSU)

Key techs: NumPy, Pandas, Matplotlib, Scikit-learn

Interfaculty course "Introduction to Deep Learning" 2024

Moscow State University (MSU)

Key techs: PyTorch (CNN, RNN, Transformers, Autoencoders)

Deep Learning School - I part (Basic) 2025

Moscow Institute of Physics and Technology (MIPT)

Key techs: PyTorch (CNN, RNN, Transformers, Autoencoders, VAE, CV)

Deep Learning School - II part (Advanced) 2025

Moscow Institute of Physics and Technology (MIPT)

Key techs: NLP (Word2Vec, RNN, LSTM, GRU, BERT), GAN, RAG, Fine-tuning (Hugging Face)
